

CAM Phase Three Opportunities

South West NRM is now accepting applications for the next phase of Collaborative Area Management (CAM) cluster funding. **Applications will close 5pm, 21st April 2017.**

South West NRM's Collaborative Area Management program will assist rural landholders to construct high integrity cluster fencing for wild dog management throughout South West Queensland.

The project aims to reduce the significant impacts of wild dogs on livestock, native species, and human and domestic animal safety. Funding will specifically target areas with high wild dog density and evidence of high impacts.

\$2 million in funding is currently available to cluster groups within the Priority One shires of Murweh, Paroo, and Quilpie, as well as the Priority Two shire of Bulloo.

For further information please refer to the advert below, or visit the project website at www.southwestnrm.org.au/clusterfencing.

Cluster fencing funding now available!

Applications close 21 April 2017

South West NRM Ltd

What's available?

Up to \$2,500 per km of high-integrity exclusion fencing materials to provide wild dog and invasive animal protection to a cluster of rural properties.

Who's eligible:

Clusters of rural landholders within the priority 1 shires of Murweh, Paroo, and Quilpie, and priority 2 shire of Bulloo.
