Scope and Sources

This bibliography originated from three earlier compilations of publications relating to sheep and wool production.

**Charleville Pastoral Laboratory (Peter Johnston)**
This listing commenced as a listing of articles published by officers stationed at this centre. As the pasture research programme for western Queensland operated from this base, it was expanded to include pasture work conducted in the northern mitchell grass area as well as some other topics referring to the area.

**Toorak Research Station (Tony Bird)**
*Publications on research conducted at Toorak Sheep Field Research Station, Julia Creek,* compiled by Tony Bird in 1987.

**Sheep and Wool bibliography (Mary Rose)**
Technical publications by staff of Sheep and Wool Branch and its successor business units.

It was supplemented by personal bibliographies provided by DPI staff working in this area, and with records from the ARI publications database and the DPI Library catalogue.

The records were initially entered onto a Papyrus Bibliographic database, then were transferred to Endnote in August 2002 and updated with items published to that date.

A floppy disk copy of this Microsoft Word document and the Endnote library file is attached. The database records are to be incorporated in the DPI Staff publications Endnote database available on the DPI InfoResearch website.
